NOTICE

RE: NOTIFICATION REQUIREMENT FOR ASBESTOS HAZARD EMERGENCY RESPONSE ACT (AHERA)

In October of 1987 the Environmental Protection Agency passed a law called the Asbestos Hazard Emergency Response Act (AHERA). This law requires that all primary and secondary schools in the United States be inspected for the presence of asbestos containing materials. It also requires that a report on this inspection along with a management plan be kept on file and be made available to representatives of EPA, the State, the public, school employees and their representatives and parents. This management plan will indicate where asbestos containing materials were found, what condition they are in, and what plans are underway for repair, renovation, or removal of such materials.

In order to comply with this regulation, Dixon Public Schools District #170 employed the services of Jenkins Professionals, Inc. to perform the inspection and development of management plans in 1988 and the management plan was submitted to the Illinois Department of Public Health. Three Year AHERA re-inspections of each building were performed in the summer of 1992, 1995 and again in 1998 by Beling Consultants, Inc. In 2001 and 2004, Raymond Professional Group, Inc. performed the 3 year AHERA re-inspections. In 2007 and 2010 Aires Consulting Group, Inc. performed the 3 year AHERA re-inspections. A copy of the management plan will be on file in the office of each individual school and at the District Administrative office, and will be made available for inspection during normal business hours within five working days after receipt of a written request for inspection.

Anyone interested in examining the management plan should direct their request to:

Business Address: 1335 Franklin Grove Road
Dixon, Illinois 61021

Should you have any questions, please call Mr. David Blackburn at 815/284-7722.
